Presentation of the 12 Olympian Gods

Jan 27, 2016 304 Views

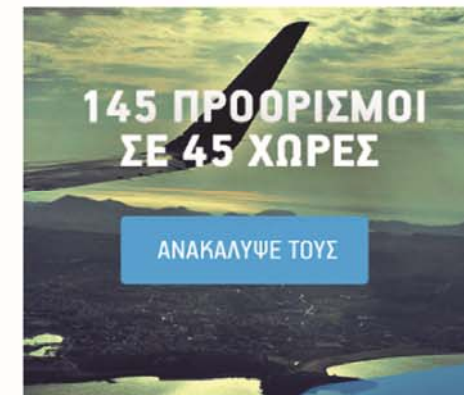

In "Alexander the Great" by Ulrich Wickens is stated that "in order to understand the Greeks we must get into the specificity of their nature" and as Jacob Burckhardt once said, "the myth is the virtual foundation of their entire being". It was usual for the Greeks, even in cold political cases, to refer to mythological incidents or to form the myths in accordance to the interests of their present as well to project their present situations to the mythical times in order to gain more power. Even in the life of Alexander the Great that was what played leading role.

(M.P. Nilsson, Cults, Myths, Oracles and Politics in Ancient Greece)

The initial, the archaic form of the myths has been lost therefore the portion that has been preserved today and can be presented, has ended being extremely compact. In Ovid we discover that the archaic spirit has been adulterated because of the "refining" process
- Karl Kerényi, *Die Mythologie der Griechen*, 1966

Τζουμέρκα τουρισμός υπαίθρου

Οκτ 21, 2015 354 Views ΦΥΣΗ

Το βουνό Τζουμέρκα (ή αλλιώς Αθαμανικά Όρη) είναι μια μεγάλη οροσειρά που χωρίζει την Ήπειρο από τη Θεσσαλία. Η ψηλότερη κορυφή έχει 2.429 μ. υψόμετρο. Τα περισσότερα από τα χωριά που φωλιάζουν στις πλαγιές των Τζουμέρκων ανήκουν στο Ν. Άρτας (στο νότιο τμήμα της οροσειράς), υπάρχουν όμως και μερικά χωριά που ανήκουν στο Ν. Ιωαννίνων (στο βόρειο τμήμα).

Πρόκειται για ένα μεγάλο ορεινό συγκρότημα χωριών και αποτελεί γεωγραφικό όριο των Νομών Άρτας, Ιωαννίνων και Τρικάλων.

Στα Τζουμέρκα είναι χτισμένα 47 χωριά που έχουν κοινό πολιτιστικό και ιστορικό παρελθόν και τα πιο πολλά είναι χτισμένα σε υψόμετρο άνω των 2000 μέτρων.

Τα Τζουμερκοχώρια, όπως έχει επικρατήσει να λέγονται, χτίστηκαν μεταξύ 14ου και 15ου αιώνα, κατά την περίοδο της Τουρκοκρατίας και διαδραμάτισαν σημαντικό ρόλο στην νεότερη ελληνική ιστορία.

Πολλά χωριά έχουν ενταχθεί στο δίκτυο προστατευόμενων περιοχών Natura 2000, λόγω των σπάνιων ειδών ορνιθοπανίδας που απειλούνται με εξαφάνιση.

Και άλλα προστατευόμενα είδη ζώων, όμως, βρίσκουν καταφύγιο στα δάση της περιοχής που περιλαμβάνουν έλατα, βελανιδιές, οξείες, πεύκα, κουμαριές, πιές και πλατάνια.
